***Response to Arguments***

Applicant's arguments filed 12/11/07 have been fully considered but they are not persuasive.

Regarding applicant's arguments beginning on page 2 of Remarks, applicant argues the presently claimed subject matter is neither shown nor suggested by Kishinami et al. (hereafter Kishinami)(US 6,118,739). The applicant supports this assertion by citing Column 2, lines 37-58 of Kishinami. The crux of applicant's argument is that the eccentricity measurer in claim 1 is an angle measuring device, rather than both an amplitude and phase measuring device as in Kishinami. The Examiner concedes to the fact that Kishinami discloses eccentricity amplitude measuring means in the eccentricity unit. However, Kishinami also discloses eccentricity phase measuring means, which corresponds to the angle measuring recited in claim 1. As currently presented, claim 1 (as well the other independent claims which are deemed to correspond or be similar to) only requires that the "eccentricity measurer" measures angle information. Claim 1 does not disclose any feature as to the number of parameters or variables used to measure eccentricity. As clearly disclosed in Column 2, lines 37-58 of Kishinami, the eccentricity measuring unit contains eccentricity phase measuring means, which corresponds to the angle measuring of claim 1. Thus, the Examiner believes that Kishinami discloses all of the limitations of claim 1 (as well the other independent claims which are deemed to correspond or be similar to). Therefore, the previous grounds of rejection are maintained.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kishinami et al. (hereafter Kishinami)(US 6,118,739), as applied in the previous Office Action dated 10/1/07.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamashita et al. (US 5,896,354) discloses an optical storage apparatus.
